用法:

利用本燈箱各種光源,檢查樣品是否有同色異譜 (即該顏色在同一種光源下為相配,但在另一光源下卻有差異),當試過不同光源後,而結果得出同一色譜,該顏色便是所需要的高質量顏色!

備註:所有燈管使用1,500 小時後需要更換!

Using:

Have multiple light source to check for the presence of metamerism (color appears to match under one light source , but is distinctly different under another). By eliminate metamerism, you'll maintain the highest standards for the colors you select or specify.

Note: The lights be changed if after used 1,500 hours!
